-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 7, 8, and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. The terms "similar" and "different" in claims 7, 8, and 9 are relative terms which render the claims indefinite. The terms "similar" and "different" are not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. In the case of claims 7-9, the claims recite that the apertures and detectors are either similar or different. It is not clear how an aperture may be similar to a detector. Simultaneously, plural apertures are by their very nature different because in order for them to exist they must occupy different positions and thereby are at least different in this respect. The examiner is of the opinion that the limitations of these claims do not further define the invention or do not recite the physical relationship between apertures and detectors in a clear manner.

Claim Objections

4. Claim 8 objected to because of the following informalities: The claim language is not grammatically correct. Please examine the language place the claim in proper format. Appropriate correction is required.

Allowable Subject Matter

5. Claims 1-6, 10-18, and 20 are allowed.
6. The following is an examiner's statement of reasons for allowance:
7. The prior art fails to teach or fairly suggest a device and method where in a charged particle beam device, the deflection system is structured to generate a field which causes a primary charged particle beam and specimen released charged particles to travel along the same path, and where the same deflection system is utilized to switch between two detection units.
8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David A. Vanore whose telephone number is (571) 272-2483. The examiner can normally be reached on M-F 7:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Kim can be reached on (571) 272-2293. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
